

BIG BAG DISCHARGE UNIT WITH HOIST

FOR THE LOADING AND
DISTRIBUTING OF BULK MATERIALS

- > Robust Construction
- > Easy to Operate Electronic Controls
- > Loads up to 1 ton of Material
- > Stainless Steel Discharge Bin
- > 0.75 KW Rotary Valve
- > Increase System Feed Rate
- > Improve Site Safety
- > Effortless Material Loading
- > Improved Material Distribution
- > Low Maintenance

> DESCRIPTION

The Big Bag Discharge unit with its easy to operate travel hoist provides a safer way for your material to be fed directly to your process machines.

Comprising a Stainless Steel hopper body which incorporates a side access door allowing for material to be alternatively deposited without the use of the loading hoist.

> OPERATION

Material can be safely and effortlessly loaded via Big Bags. The travelling chain hoist can be manoeuvred and lowered directly over a full Big Bag.

The Big Bag once safely hooked on to the hoist can be lifted and manoeuvred directly over the stainless steel material discharge hopper, ready to be discharged.

The material once discharged is fed into a rotary valve enabling the material to be efficiently fed into your pneumatic conveying.
